

I never realized how valuable a service XM radio provided until we installed in our main traveling vehicle. Not only does it provide a source of entertainment that is more suited to our needs, it also provides us with valuable news, weather and traffic information. I have traveled by air my entire life, and unfortunately due to world events, I have become more settled into the fact that driving is a safer means of travel. We rely on XM radio during our travels. My future husband is a huge fan of NASCAR (which is aired over XM radio)....if it weren't for that, it would be next to impossible to get him on vacation or a trip without being able to listen to the race. XM radio has also been a wonderful substitution for local radio stations which are filled with commercials.....my time is valuable, and XM radio provides selections of music and comedy that is unsurpassed by any radio station. We are looking forward to our 10 day ROAD trip to Tampa, Florida from Louisiana with XM Radio. The services of XM Radio helps to provide us with a safe path to our destination, a service that cannot be measured by dollars.
